

# IMPLEMENTATION NOTES

Features that could've been added and improvements that could've been made with more available time:

- Unique UFO movement patterns.

- More ship animations

- More sprites and sprite effects

- More power ups such as bombs, and other unique power ups

- Different modes of multiplayer (internet play), alternate play

- Specific behaviors of the power ups: different damage for each type of shot was not implemented

- Leaderboard

- Better coding. Our knowledge and experience with coding was definitely a bottleneck for the efficiency of our code.
